EDUCATION

University of South Florida, Tampa, FL

B.S. Computer Science | GPA: 3.80 / 4.00

Awards: Dean's List (Fall 2024, Fall 2025); USF Green & Gold Directors Waiver Award

Graduated May 2026

EXPERIENCE

Software Engineer Intern

Soluscode - Ed-Tech SaaS Startup

Jan 2026 - Apr 2026

- Identified an N+1 query bottleneck in leaderboard logic and rewrote it using a PostgreSQL window function and compound indexing.
- Implemented User/Admin/Operator permissions, JWT session handling, route middleware, and premium-access controls.
- Reviewed authentication paths and addressed privilege-escalation issues found during internal review.
- Replaced a spreadsheet-based contest workflow with an admin dashboard for submissions, bulk user management, and role-scoped access.
- Removed the need for non-engineering staff to directly access the production database for those operations.

Software Engineer Intern

SimrikMed LLC - Healthcare SaaS Startup

May 2025 - Aug 2025

- Built patient-data visualization features using React and TypeScript with lazy loading and state optimization.
- Developed Node.js REST APIs using MongoDB aggregation pipelines and compound indexes.
- Automated CI/CD workflows using Jenkins and Bash and expanded automated testing.
- Automated AWS EC2 and RDS provisioning for development environments.

Software Engineer Intern

Mandavya Construction

May 2024 - Jul 2024

- Built a React/Node.js operations dashboard and centralized equipment tracking with digital logs.
- Digitized safety inspections through a mobile-friendly React interface.

PROJECTS

SupportDesk - Customer Support Platform

TypeScript / React / Node.js/Express / PostgreSQL / Redis / BullMQ / SSE / Docker

- Organization-scoped ticketing API with admin, agent, and customer permissions.
- Real-time ticket conversations using Redis Pub/Sub and Server-Sent Events.
- Background email notification processing using BullMQ with retry backoff and persisted job status.

SplitEase - Group Expense Splitting Platform

TypeScript / React / Node.js/Express / PostgreSQL / Socket.IO / Zustand / Plaid Sandbox / Jest

- Equal, percentage, and exact expense splits with PostgreSQL transactions; partial settlements and history.
- Real-time recalculated balances with Socket.IO; Plaid Sandbox account linking and transfer authorization.
- AES-256-GCM encryption for stored access tokens; authentication and payment-access tests with Jest/Supertest.

AI Resume Screener

TypeScript / React / Node.js/Express / PostgreSQL / OpenAI / Gemini / Zod / pdf-parse

- Extracts text from uploaded resume PDFs and compares resumes with job descriptions using OpenAI or Gemini.
- Validates model output with Zod and handles provider failures with timeouts, retries, and structured errors.
- JWT authentication, user-scoped scan history, transactional result storage, and reusable scorecards.

SKILLS

Languages: TypeScript, JavaScript, Python, SQL, C, C++
Frontend: React, Tailwind CSS, TanStack Query, Zustand
Backend & Data: Node.js, Express, REST APIs, PostgreSQL, MongoDB, Redis, BullMQ
Infrastructure: AWS, Docker, Kubernetes, Terraform, GitHub Actions, Jenkins, Nginx, Linux
Additional: Git, Bash, Jest, Supertest, Socket.IO, SSE
AI/ML: OpenAI API, Gemini API, PyTorch, scikit-learn, Hugging Face Transformers
